Chirag

New Delhi, India | +91-7015707825 | chirag8056.in@gmail.com | LinkedIn | GitHub

Education

SRM University, Delhi NCR, Sonipat, Haryana Final Year | Expected Jul 2027
Bachelor of Technology in Computer Science & Engineering | CGPA: 9.03/10

Technical Skills

Languages: Python, SQL, Java, JavaScript, C, HTML/CSS, LaTeX
Frameworks & Libraries: React.js, Flask, Streamlit, LangGraph, Pandas, NumPy, Matplotlib
AI/ML: Scikit-learn, XGBoost, Random Forest, LLaMA-3, Mistral, LLM Integration, LangChain, Agentic AI Pipelines
Data Science & Analytics: Statistics, Power BI, Tableau, Microsoft Excel
Tools & Platforms: Git, GitHub, AWS, Azure, Docker, Supabase, VS Code, Jupyter Notebook, REST APIs

Experience

AI Research Intern Jul 2025 - Jan 2026
Netaji Subhas University of Technology (NSUT), New Delhi, India | Certificate

- Developed an XGBoost-based IoT Intrusion Detection System on UNSW-NB15 (175,341 train / 82,332 test samples, 45 features), achieving 95.04% accuracy, 95.06% precision, 95.04% recall, and 95.05% F1-score; validated cross-dataset generalization on NSL-KDD, achieving 92.10% accuracy.
- Architected a multi-LLM agentic pipeline(LangGraph) integrating LLaMA-3-8B for task planning/tool selection and Mistral-Medium for goal-state evaluation, achieving 94.6% Tool Selection Accuracy and a 96% task completion rate on a 50-query benchmark, with 0.9s median latency for direct commands and 4.8s for complex multi-step tasks.
- First Author, "Design and Implementation of IoT Intrusion Detection Centric Agentic AI with Auxiliary Conversational Capabilities," published in Elsevier's Pervasive and Mobile Computing Journal (2026).

Projects

AeroSentinel AI - Aircraft Engine Predictive Maintenance System 2026
XGBoost, Random Forest, Streamlit | Project Repo

- Built a predictive maintenance platform on the NASA CMAPSS dataset using XGBoost and Random Forest ensemble models to estimate Remaining Useful Life (RUL), achieving a MAE of 14.0 cycles.
- Developed a Streamlit dashboard for real-time sensor monitoring, RUL forecasting, anomaly detection, and explainable AI outputs across 16 engine sensors, backed by a custom feature engineering and ensemble inference pipeline.

HealthWise - AI-Powered Pre-Diabetes Risk Prediction Tool 2025
Python, Pandas, Flask, React.js, Supabase | Project Repo

- Built an end-to-end ML pipeline on the PIMA Diabetes dataset using a Random Forest classifier, achieving 92% model accuracy.
- Performed data preprocessing and feature engineering on the PIMA dataset to prepare inputs for model training.
- Developed a full-stack web app (Flask backend, React.js frontend, Supabase database) to serve predictions and store user history with Power BI dashboards to visualize risk factors and health insights for end users.

Achievements

- Core Member & Technical Trainer, CIIE – SRM University Delhi NCR (Nov 2024–Present): Delivered 10+ technical workshops on web development, ML, and DSA across multiple universities.
- Smart India Hackathon (SIH) 2025: Led a team selected among 90 teams through the CIIE, SRM University Delhi-NCR, internal hackathon to advance to the external SIH stage.
- Finalist, SGU University Hackathon, Ghaziabad (2025): Among 850 participants.
- SRM Builds 5.0 Fintech Hackathon Winner (2024): Won among 100+ participants.

Certifications

- **Google Cloud**: GenAI Study Jam – Prompt Design, Vertex AI, Gemini, and Streamlit.
- **Infosys**: Artificial Intelligence Primer Certification, Introduction to Data Science, Introduction to Deep Learning, Introduction to Natural Language Processing.
